

XM Satelite Radio is currently the highest quality broadcast material - ANYWHERE. Superior to all Broadcast/Cable Television and all AM/FM radio transmissions - XM's quality and variety of programming is second to none. As an avid XM listener, I prefer to receive traffic and weather and all-other radio needs from XM. Please do not impede their right to service their loyal listening community, who looks to them and trusts them to provide these services.

XM is currently the last bastion of decent and worthwhile CONTENT in the broadcast industry. Please do not hamper or diminish their service capabilities in any fashion.
